Node, Angular, React, Redux, Highcharts

Version Control, Responsive Design, Performance, A11y standards, TDD

Experience

Think Company / UI Developer

June 2016 - Philadelphia, PA

As a UI Developer, I play a crucial role in developing complex SPA, CMS and static page projects for clients of all kinds. I help our team transition from jQuery and AngularJS to Typescript and Angular2, improving the quality of our work and keeping our dev team current.

Think Company gives me an understanding and appreciation of high quality design, thoughtful user experience, and content strategy. Departments at Think Co share knowledge and empower one another. To that end, I serve as an active consultant for both our clients and my teammates for the software solutions we need to build high quality websites.

Quill.org / Software Developer Apprentice

March 2016 - June 2016, New York, NY

I honed my skills with Node, React and Redux on education application software while picking up crucial skills in Git, TDD, and

Education
